Notice of Availability
Forms and Instructions for Electric
Transmission-related Data
Prepared in Support of the
2011 Integrated Energy Policy Report
Publication No. CEC-700-2010-018-CMF
Docket No. 11-IEP-1E

The *Forms and Instructions for Electric Transmission-related Data*, prepared in support of the *2011 Integrated Energy Policy Report*, ask utility owners of bulk electric transmission system facilities to submit information on their bulk transmission network and on specific projects identified in their transmission expansion plans, as well as data on anticipated transmission corridor needs. While the Energy Commission cannot require independent transmission developers to respond to these data requests, it encourages independent transmission developers to voluntarily supply information on their projects.

The forms and instructions were presented by Energy Commission staff at a publicly noticed workshop on November 30, 2010. Public comments on these forms and instructions were solicited and received through December 14, 2010. The Energy Commission's Transmission and Regional Planning Committee revised the draft staff report, incorporating public comments, and published the forms and instructions as a **Committee Final Report** on December 27, 2010. At the Energy Commission's business meeting held on January 12, 2011, the Commission adopted the *Forms and Instructions for Electric Transmission-related Data*. Electric transmission system owners in California have until **March 18, 2011** to submit the completed forms.

These forms and instructions are available free from the Energy Commission's website at:

www.energy.ca.gov/2011_energypolicy/datacollection/index.html

A print copy is available for \$5.00. Please send your request and check or money order made out to the California Energy Commission to:
